

"Finally, a better way to make your decision."

(480) 247-3395

Physicians thinking about adopting an Electronic Medical Record system now have a new and better place to start the selection process. Desert Practice Management has created the first-of-its-kind EMR Demo Lab, providing physicians a convenient way to get the critical and unbiased information they need to make a good decision.

What is a Demo Lab?

Located in our office in Chandler, Desert Practice Management has compiled an EMR Library of well ranked, quality products from companies that are leaders in the field. We combine an interactive demonstration of the EMR applications with our Introduction to EMR Class to create a customized Demo Day for each practice.

Total EMR Solutions provides:

- Hands-on exposure to multiple EMR products at the same time
- Side-by-side comparison of EMR features and functionality
- A vendor neutral environment - we do not sell software, hardware or IT services
- Critical information about the EMR industry, trends, certification, reimbursement and much more
- A thorough explanation of technology options and relative costs
- A discussion of how to pay for an EMR and what Return on Investment to expect
- A Gadget Room where you can see the latest hardware and peripherals
- Open discussion with an experienced facilitator to address any specific practice questions or concerns

What is Included?

This package includes a site visit to your office, a customized 8-hour day in our Demo Lab, a catered lunch, and a copy of The Total EMR Solutions Guidebook for each participant.

About Us

Total EMR Solutions is a division of Desert Practice Management, a consulting firm dedicated to making the business of practicing medicine successful. It is our job to first understand your business then create solutions that fit your specific needs and budget.

For more information or to see what software is available in our EMR Library, call us at (480) 247-3395 or visit us on the web at www.TotalEMRSolutions.com
